

**SERVER HOSTING:**

**SECURITY & MONITORING:**

**BIOMETRIC/ MAGNETIC ACCESS CONTROL**

All visitors to the Data Centres must be accompanied by an Ozone employee at all times. The Client has to give Ozone 24h notice prior to visiting the Data Centres. A pre-authorized list of employees authorized to visit the Data Centres are to be provided to Ozone.

Access to the Cape Town Data Centres is controlled by a Biometric fingerprint access system. Ozone is able to manage the movements of staff by identifying and verifying them with this fingerprint technology.

To access the Johannesburg Data Centres, employees need to pass through the building's security as well as Biometric Access control before reaching the actual Data Centre's keypad access system. A unique combination is entered into the keypad which will then disengage the magnetic hold on the doors.

In the event of an emergency access can be arranged by contacting Ozone on any of the following numbers:

Office Hours : 086 010 4155

24H Emergency No : 082 702 7939
