

# Datasheet Kerio Workspace

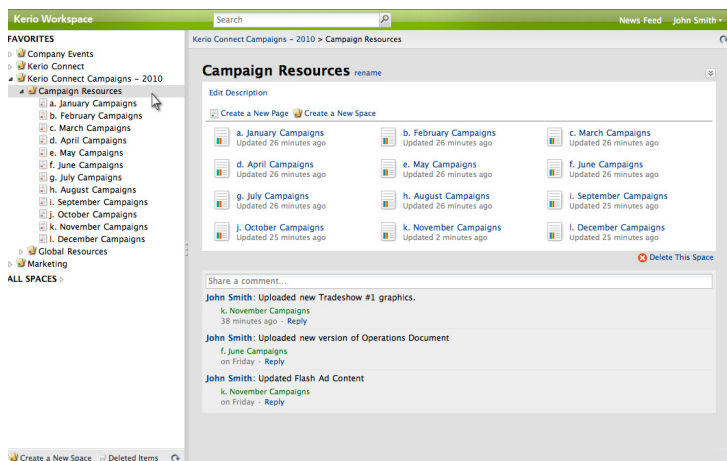

**A SINGLE PLACE TO SHARE FILES  
AND COLLABORATE ON GREAT IDEAS.**

Kerio Workspace is a server software solution for businesses that allows teams to spend less time trying to find documents and files and more time collaborating on them.

 <b>Track Changes</b>	<ul style="list-style-type: none"> <li>Review recently posted comments from multiple Spaces in a single place.</li> <li>Track progress and view content with automatic emails or mobile device access.</li> <li>Access version history of any uploaded file.</li> </ul>	<ul style="list-style-type: none"> <li>Easily keep track of project progress, activity, and feedback from contributing team members.</li> <li>Never miss important updates or content changes while out of the office.</li> <li>Compare and restore old file versions easily.</li> </ul>

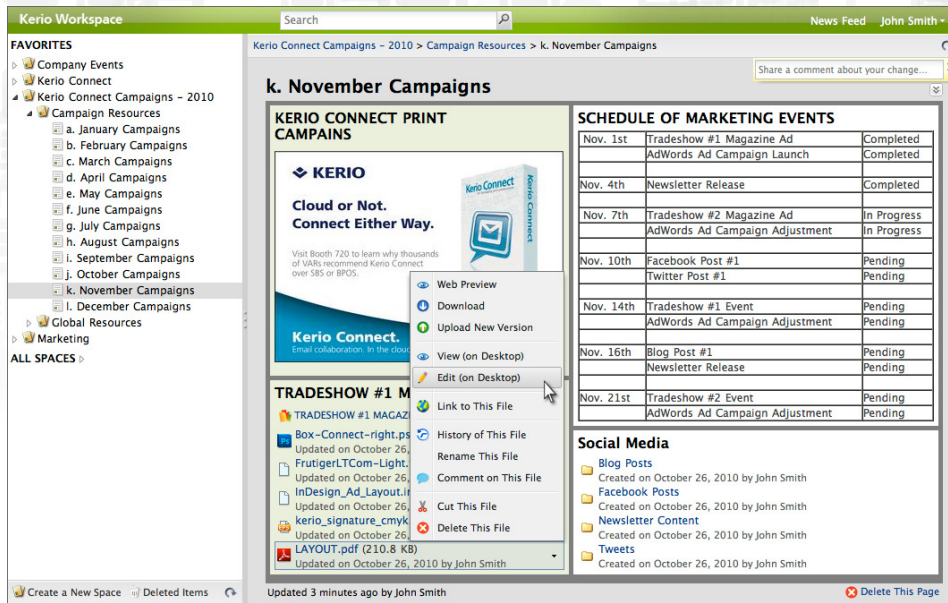

Organise information into dedicated Spaces. A Space can have any number of Pages. If you don't like where a particular Page sits, move it to a better home in a different Space.

Let your News Feed or your inbox notify you of changes as they happen in your favorite spaces. Feel free to comment on them. Like social networking, but more productive.

# Open a browser, update your content, and share it with colleagues simply by clicking Save.

## System requirements

### Server Application

#### Operating systems

Windows XP SP2 or newer  
Debian Linux 5.0 or newer (only 32-bit)  
Ubuntu 8.04 LTS or 10.04 LTS (only 32-bit)  
Mac OS X 10.6 Snow Leopard or newer

### Desktop Client

#### Operating systems

Windows XP SP2 or newer  
Mac OS X 10.6 Snow Leopard or newer

### Web Client

Internet Explorer 7 and 8  
Firefox 3 or newer  
Safari 4 or newer  
Chrome 5 or newer

### Mobile Client

iPhone 3G/3GS/4G with iOS 4

## GET STARTED

Start by setting up a simple page and post your project notes, meeting minutes, memos, ideas, or files. Invite your team members to view and edit the content. Watch productivity go up almost immediately.

## PAGES

Build a simple web page with just plain text. Or build a cool looking page with a mashup of file libraries, images, text blocks, background colors, tables, videos, comments, hyperlink - you name it.

## SMART STORAGE

Turn Kerio Workspace into your new smart file server. Organise files into file libraries. Upload files of various types and preview them right from the browser. Need to send a huge file to a colleague? Send a link instead. It's a click away.

## SHARING

Make sure only the right eyes see the content. Set appropriate access controls so authorised colleagues can edit the pages while others can only view them.

## ENCOURAGE TEAMWORK

Have colleagues work with you on content in real time. Make changes to any text authored by other people. Improve the quality of content as you go, all with a great built-in text editor. It's just like a wiki, only simpler.

## DISCOVER CONTENT

Type any keyword and Kerio Workspace will give a list of all relevant files, pages, and spaces. Each and every piece of information is searchable.

## EDIT FILES

Simply click on a file context menu to open the file in your desktop application. Edit the file with all the comfort of its native functionality. Put the updated content on Kerio Workspace just by clicking Save.

## ACCESS FILE HISTORY

Easily access previous versions of a file. Don't like the latest version of file? No problem, just revert back to the previous one.

## BACKUP

Whatever you do, Kerio Workspace performs automatic backups to protect your data.

## VIEW ON IPHONE

View Workspace on your iPhone. Optimised for the smaller screen, you can read content everywhere the day takes you.

## DIRECTORY INTEGRATION

Link Kerio Workspace to your Open or Active Directory and your colleagues will have access to Kerio Workspace instantly. And because all they need is a browser, they can securely log in from anywhere and have their activity and progress tracked.
